Category B driving licence

TECHNICAL SKILLS

Programming
Python · Fortran 90

Scientific computing
NumPy · Matplotlib

Prototyping and instrumentation
Arduino

Development tools
Git · GitHub · Linux

Document and image processing
OCR · OpenCV

AI tools
Prompt engineering

LANGUAGES

Arabic Native

French Fluent

English C1

German A1

INTERESTS

Football · Formula 1
Running

ADAM EL MEHDI

Engineering Student · Fluid Mechanics, Energy and Environment

ENSEEIHT — Toulouse INP

Engineering student in Fluid Mechanics, Energy and Environment at ENSEEIHT, with a strong scientific foundation from two years of intensive preparatory studies. Curious and self-directed, I enjoy physical modelling, experimentation and computational tools, as well as teamwork and interdisciplinary projects.

EDUCATION

ENSEEIHT — Toulouse INP — 2026–2029

Toulouse, France · Expected graduation 2029

French engineering degree in Fluid Mechanics, Energy and Environment (MF2E).

Lycée Moulay Youssef — 2024–2026

Rabat, Morocco

MP* · Two-year intensive preparatory programme in mathematics and physics for engineering schools.

SCIENTIFIC AND TECHNICAL PROJECTS

TIPE · Eddy current braking

Independent scientific research project — **2025–2026**

Studied the effect of conductor geometry on eddy current braking.

- Independently designed and built the experimental setup outside supervised labs; selected and purchased components.
- Used Arduino and Hall sensors to acquire measurements; programmed data acquisition and processed data with Python.
- Compared conductor geometries and evaluated experimental results against a physical model.

IMSA Sentinel

IA for Impact Hackathon · Team project — **2026**

Automated verification of medical billing documents using OCR and anomaly detection.

- Helped design the validation logic, plan the solution and identify opportunities to improve its functionality.
- Used prompt engineering and contributed to coding simple features alongside the development team.

Python · OCR · OpenCV — **GitHub repository**

STUDENT INVOLVEMENT

Student Representative · ENSEEIHT — 2026–2027

Represent first-year MF2E students and liaise with the academic team.

N7 Racing Team — Since 2026

Member · Mechanics & Aerodynamics Division

Student association focused on motorsport and engineering.
